

# LEAD-AI

## Empowering Adult Learners and Educators through Artificial Intelligence

Visit Our Website

Artificial Intelligence is reshaping the way we work, learn and teach.

LEAD-AI supports adult learners and educators in developing the skills needed to use generative AI responsibly, ethically and effectively in professional contexts.

Funded by the Erasmus+ Programme, the project develops innovative methodologies, practical training modules and an AI-enhanced digital learning platform tailored to adult education.

**4 European partners working together across borders**

**30-month cooperation project**

**AI capacity-building programme for adult learners and trainers**

**Open-access digital platform with integrated AI learning tools**

### Problem

Artificial Intelligence is rapidly transforming work and education.  
Many adult learners and educators lack the skills and confidence to use generative AI effectively, ethically and responsibly.

### Solution

A structured AI capacity-building programme for adult education, including modular training content, ethical guidance, a Train-the-Trainer approach, and an open-access AI-enhanced learning platform.

### Impact

Strengthening AI literacy and digital competences across Europe and supporting lifelong learning, professional upskilling, and responsible digital transformation in adult education.
